OBJECTIVE

Dynamic Full Stack Developer with nearly three years of experience in designing, developing, and maintaining web-based applications. Proficient in modern technologies such as **ReactJS, PHP/Laravel, Python, and PostgreSQL**. Excited to **relocate to Toronto** in June, I am actively seeking a challenging role that not only leverages my technical skills and passion for problem-solving, but also allows me to showcase my skills in frontend design.

EXPERIENCE

Software Developer - AGILE Lead Dec 2022 – Present
Sagacity Software Inc. *London, ON*
- Architected, developed, and maintained an advanced IoT smart-metering platform for home utilities using ReactJS for frontend, PHP/Laravel for backend, and PostgreSQL for database management on Linux machines.
- Managed Agile strategies for the frontend team, facilitating daily scrums, sprint planning, and backlog grooming. Utilized JIRA for tracking project progress and ensuring timely delivery of tasks.
- Utilized ReactJS to maintain and enhance an eCommerce procurement system selling meters. Collaborated with cross-functional teams to gather requirements and design a visually appealing and intuitive redesign of the platform, resulting in increased customer engagement.
- Led the frontend development for the platform, efficiently bridging the communication gap between developers, designers, and clients. Devised technical requirements and specifications, delivering user-centric solutions.
- Collaborated closely with developers and managers, translating UI/UX designs into code. Practiced the implementation of responsive designs and the creation of reusable components using ReactJS and Figma.
- Mentored co-op students, emphasizing the importance of clean code, test-driven development, and Agile methodologies. Facilitated hands-on training on JavaScript and its application in a business environment.

Software Developer Jan 2021 – Dec 2022
Sagacity Software Inc. *London, ON*
- Diligently resolved front-end related bug/feature tickets, demonstrating proficiency in debugging and performance optimization. Ensured cross-browser compatibility and addressed frontend performance issues.
- Utilized Photoshop for designing and refining UI/UX elements, creating compelling client-facing graphics that adhered to brand guidelines and improved user engagement.
- Developed comprehensive backend web reports for management analytics, utilizing Python Pandas and SQL queries to extract and present critical data.

EDUCATION

Fanshawe College Sep. 2019 – Dec 2022
Advanced Diploma in Computer Programming and Analysis, CO-OP, Deans Honor Roll *London, ON*

PROJECTS

School Tracker Web Portal | *React JS, Laravel, AWS EC2*
- Engineered a full-stack, mobile-optimized web portal using ReactJS and Laravel, deployed on AWS EC2.
- Implemented a responsive design that was both visually appealing and user-friendly across various devices, ensuring seamless accessibility for users on-the-go.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Python, SQL, GraphQL, C Sharp , HTML/CSS
Frameworks: React JSX, Laravel, Node.JS, Vue JS, jQuery, .NET
Developer Tools: Linux Terminal, Git Management, Jira Atlassian, NPM, SaSS, AWS EC2, Figma, RESTFUL APIs, Photoshop, AGILE Methodologies, PostgreSQL, Pandas
